OBJECTIVE

"To secure a position in a leading MNC where I can apply my knowledge of information technology, enhance my technical skills, and contribute to innovative projects, while continuously learning and growing in a dynamic and global environment."

SKILLS

Technical skills:

Computer skills:

MS Word, MS Excel, MS PowerPoint, Python, Java, HTML, C, JavaScript, Figma, CSS

Soft skills:

Leadership

Adaptability

Quick learner

Teamwork

Problem solving

AREA OF INTEREST

Database Management

Networking and Security

Cloud Computing

Artificial Intelligence & Machine Learning

Data Science and Analytics

Cybersecurity

UI/UX design

BHAVANA C.P

Salem, 636451

EDUCATION

RP sarathy Institute of technology

Passing Year - 2023-2027

Information technology

Grades : 8.88

Sri Raghavendra matric hrs.sec.school

Passing Year - 2023

Higher secondary

Grades : 83.3%

Sri Raghavendra matric hrs.sec.school

Passing Year - 2021

SSLC

Grades : 95%

EXPERIENCE

Stack queue development

Core java

- Underwent hands-on training in Java programming and OOP concepts.
- Designed and implemented Stack and Queue operations to strengthen data structures knowledge.
- Learned about exception handling, collections, and file handling.
- Gained practical exposure to applying DSA concepts in solving real-time problems.

Image Con Internship

Image Processing & Computer Vision

- Worked on image enhancement and feature extraction techniques.
- Gained exposure to OpenCV and basic computer vision algorithms.
- Applied image classification and filtering methods for small projects.
- Improved understanding of signal processing and visual data analysis.

Dev Technology

Mobile Application Development

- Participated in training on mobile app design and development.
- Learned how to build front-end UI using XML/Flutter and connect with databases (Firebase/MySQL).
- Understood the process of app deployment, debugging, and testing.
- Enhanced knowledge of user interface design and client-server interaction.

PROJECTS

Medical diagnosis using database analysis

This mini project focuses on developing a system that assists in the preliminary diagnosis of diseases by analyzing patient data stored in a medical database. The system leverages data analysis techniques to identify patterns, symptoms, and correlations between various health conditions. By querying the database and applying basic rule-based or statistical algorithms, the project aims to suggest possible diagnoses, thereby supporting medical professionals in decision making.

CERTIFICATIONS

- Computer vision hands-on training
- Machine learning
- Python hands-on training
- Design Verification Engineering in VLSI
- Binary Tree Made Easy
- Need for Design, Thinking, and Backend Architecture
- AI Uncovered, Learn and Advanced
- From Data to Decisions
- IoT Fundamentals

ACHIEVEMENTS & AWARDS

ACHIEVEMENTS & AWARDS

- Academic topper during 1st year
- Best speaker
- English club president
